

## OMA announces placement of Green Notes

**Mexico City, Mexico, April 14, 2021**—Mexican airport operator Grupo Aeroportuario del Centro Norte, S.A.B. de C.V., known as OMA (NASDAQ: OMAB; BMV: OMA), announces the successful placement of Ps.3,500 million in long-term notes (*certificados bursátiles*) in the Mexican market through two tranches issued jointly as part of a program to issue long-term notes (“the Issuances”). One of the tranches was placed as a **Green Bond**. After this transaction, OMA becomes the first airport operator to place a Green Bond in the Mexican market and the only one with an outstanding Green Bond in Latin America; proceeds from the Green Bond will be used to finance sustainable projects in our thirteen airports, which seek to reduce the environmental impact of airport operations.

The Issuances were widely accepted, with participation from almost 40 investors, including “Afores”, investment funds, and insurance companies. Demand of both tranches was 4.3 times the amount offered.

The issuances are the following:

1. **Ps.1,000 million in 5-year Green Notes (ticker: OMA21v)** at a variable rate of TIE 28 + 75 basis points. The Green Notes pay interest every 28 days, and principal amount will be paid at maturity on April 10, 2026.
2. **Ps.2,500 million in 7-year Notes (ticker: OMA21-2)** at a fixed rate of 7.83%. The notes pay interest every 182 days, and principal amount will be paid at maturity on April 7, 2028.

Both issuances received the highest ratings in Mexico of Baa/Aaa.mx by Moody’s and AAA(mex) by Fitch on a national scale.

Book building took place today and settlement will occur on April 16, 2021. Proceeds from the issuances will be used to prepay, on April 19, 2021, the Ps.3,000 million Notes (ticker OMA14) that were issued in June 2014, and to finance the following eligible projects in accordance with the Green Bond Framework, which is aligned with the ICMA Green Bond Principles (GBP, 2018) and received a positive second-party opinion from Sustainability US Inc.:

- **Renewable Energy:** Investments dedicated to generation of energy from renewable sources, mostly solar power and battery banks using solar power.
- **Energy Efficiency:** Investments in high efficiency equipment that reduce energy consumption, and projects that enable monitoring and optimization of the energy consumption.
- **Other projects for Sustainable Water and Wastewater Management; and Biodiversity.**

“The Green Notes will allow us to fund sustainable investments focused mainly on the implementation of solar panels, as well as other energy efficiency and water management projects”, said Ricardo Dueñas Espriu, CEO of OMA.
